TORERO®

COMPANY PROFILE

Taiwan Chu Dai Industrial Co., Ltd. was established in 1997 and specializes in the research and development, production, and sales of TORERO brand pneumatic and electric tools. The company mainly produces a series of products including pneumatic oil pulse torque tools, electric torque tools, clutch tools, and torque measurement equipment. It provides professional equipment and tools for the automotive industry, household appliances, energy, construction, aviation, shipbuilding, and other industrial fields.

We have a professional R&D team, which has been committed to meeting the development needs of the industrial market. We continuously develop tool series products under the TORERO brand, and have designed and improved a number of patents. In particular, we enjoy a high reputation in the manufacturing field of pneumatic/hydraulic pulse torque tools and electric torque tools.

The company adopts modern concepts and advanced methods for enterprise management, and has obtained ISO-9001 (2000) quality management system certification and CE certification. At present, the TORERO brand has become a professional supplier of tightening tools and the first choice for automobile assembly plants and professional production lines at home and abroad. The products are sold well in more than 70 countries across five continents: Europe, Asia, Oceania, Africa and the Americas, with first-class distributors and after-sales service outlets in each. We have long adhered to the goal of "striving for quality first and exceeding customer expectations", and strive to build a first-class industrial equipment manufacturing enterprise to meet the needs of the industrial market.

Our business philosophy

Integrity / Innovation / Cooperation

The Spirit Of The Torero

Create an International Brand, Serve Customers with Integrity
Expand Market Space, Embrace Partners Widely

Precise Research Philosophy, Innovate Product Efficiency
Sustainable Product Operations, Care for Customers Sincerely

Battery Shut-off clutch tool - Pistol type.....	1-3
Battery Shut-off clutch tool - Angle type.....	4-6
Battery Shut-off clutch tool - Special tool.....	7-12
Battery oil pulse tool.....	13-16
Battery impact tool.....	17-20
RE-BOX-D1 Wireless transmission controller & Wireless transmission power tool.....	21-24
BM-100 Controller.....	25-26
Cordless Sensor Tool - Pistol type.....	27-31
Special gear head.....	32-35
Torque testing equipment.....	36-40
Battery rubber strip pressing tool.....	41-44

Battery Shut-off clutch tool - Pistol type

- Particularly suitable for workstations requiring operational flexibility and torque range control
- Applicable to work areas where pneumatic and electric tools with air hoses or electric wires cannot be used
- Best for use in the assembly of automotive interiors
- Complies with the ISO 5393 industrial standard
- CMK > 1.67, error value $\pm 10\%$

The display screen and buttons at the rear of the tool can perform programming functions

- Tightening speed setting
- Batch count setting
- Tightening record query
- Battery level display
- Thread speed setting
- Tool information query
- Lighting switch setting

Explanation of LED Indicator Lights

- A constant yellow light indicates low battery power, prompting the operator to replace the battery.
- A green light indicates tightening is OK and the set torque value has been reached.
- A green light accompanied by a long “beep” sound indicates that the number of normal tightenings has reached the quantity set for batch counting.
- A red light accompanied by a long “beep” sound indicates abnormal tightening or a tool malfunction.
- Alternating flashing of red and green lights indicates that the tool is in reverse rotation mode.

(Reverse torque tools need to be custom - ordered separately)

Battery Shut-off clutch tool - Angle type

- Torque range: 1.8 - 100Nm series
- Applicable to work areas where pneumatic and electric tools with air hoses or wires cannot be used
- Two types of lithium batteries available: 18V and 36V
- Complies with the ISO 5393 industrial standard
- CMK > 1.67 with an error value of $\pm 10\%$

Explanation of LED Indicator Lights

 Constant yellow light: Indicates low battery power, prompting the operator to replace the battery.

 Green light on: Indicates tightening is OK and the set torque value is reached.
Green light on with a long “beep” sound: Indicates the number of normal tightenings has reached the batch count setting.

 Red light on with a long “beep” sound: Indicates abnormal tightening or tool malfunction.

 Alternating flashing of red and green lights: Indicates the tool is in reverse mode.

The display screen and buttons of the tool can perform programming functions

- Tightening Speed Setting
- Thread Speed Setting
- Batch Count Setting
- Tool Information Query
- Tightening Record Query
- Lighting Switch Setting
- Battery Level Display

Battery Shut-off Clutch Tool - Inner Stationary & Outer Rotating Series

Especially suitable for the assembly of shock absorbers

MODEL	Torque Nm	Free Speed r/min	Special Head	Across Flats of Socket	Length (without battery)	Weight kg (without battery)	Voltage V	Order Number
LTV-40SC-60E	20-45	200	60E	10-17	488	2.11	36V2.5Ah	5E208040000
LTV-40SC-80E	45-80	140	80E	15-22	502	2.55	36V2.5Ah	5E218040000
LTV-40SC-100E	60-100	100	100E	15-22	545	3.38	36V2.5Ah	5E228040000

Note: For internal hexagon and internal Torx bolts, use a Hex 1/4" bit.

Special Head	A	B	C	D	H	Across Flats Size of Socket AF	Order Number
60E	20	57.2	39	26	30	10-17	5E201400000
80E	22	65.5	35.5	30	30	15-22	5E211400000
100E	25.5	73	40	35	30	15-22	5E221400000

- When ordering inner-stationary and outer-rotating tools or special heads, it is necessary to select matching nut sockets and bolt fixing rods according to the actual bolts and nuts, and clearly note the required specification and size on the order form.
- Special heads can also be customized as needed. For details, please consult the manufacturer.

For example:

Special Head	Across Flats Size of Nut Socket	Telescopic Length	Bolt Type	Width Across Flats of Bolt Fixing Rod
60E	13	30	External Hexagon	6
80E	21	30	Double - plane	8×6
100E	17	30	Internal Hexagon	4

■ Select the matching bolt fixing rod according to the actual bolt type and size

Bolt Fixing Rod (External Hexagon)

Across Flats S mm	Across Flats of Socket W mm	Telescopic Length mm
4	10-17	30
5	15-22	30
6	15-22	30
7	15-22	30

Bolt Fixing Rod (Double - plane)

Diameter D mm	Across Flats S mm	Across Flats of Socket W mm	Telescopic Length mm
6.6	5	10-17	30
7	5	10-17	30
8	6	15-22	30
8	6.3	15-22	30
9.55	7.6	15-22	30
11.2	8.9	15-22	30

Optional Bit (Internal Hexagon)

Across Flats S mm	Across Flats of Socket W mm	Telescopic Length mm
2-5	10-17	30
2-7	15-22	30

Optional bit (Torx)

Across Flats S mm	Across Flats of Socket W mm	Telescopic Length mm
T6-T25	10-17	30
T6-T50	15-22	30

Battery oil pulse tool

PAT.P: Monitor the working status of the hydraulic pulse unit by detecting the supply voltage change of the battery.

There is no speed reduction mechanism between the motor and the hydraulic pulse unit, avoiding impact vibration and greatly improving operating comfort.

The battery can be installed in both forward and reverse directions to adapt to environments with operational space interference.

MODEL	Head Dimensions in	Torque Range (Nm)		Free Speed r/min	Weight kg (without battery)	Voltage V

Button Operation Interface

Explanation of LED Status Indicator Lights:

- Green light on steadily: Tightening OK
- Red light on steadily: Tightening abnormal
- Yellow light on steadily: Low battery, replace the battery
- Red and green lights flashing: Reverse mode

Product Advantages

- The screen has gear settings, allowing for precise selection of the appropriate pulse number to adjust torque according to different application scenarios and combination methods.
- The electronic power - off method can greatly reduce the impact of the temperature rise of the hydraulic cylinder on the torque accuracy.
- No hand - shaking during use and no reaction force.
- Batch counting setting, effectively preventing the problem of missing locks.
- The rotation speed of the threading can be adjusted. Set the calibration locking threading rotation speed for bolts of different materials and lengths.
- The number of tool maintenance times can be set. When the maintenance times are reached, the display will remind the operator that the tool needs maintenance. The reminder can be stopped only after manual button confirmation.
- The tool model, serial number, and production date can be queried on the display.
- The number of correct tightening times, incorrect tightening times, and total tightening times of the tool can be queried on the display.
- Three - color irradiation light: The operator can more intuitively obtain the tightening status of the bolt from the color of the irradiation light.

Product Features

Impact torque - setting tool achieves extremely high tool efficiency while controlling quality.

Large - capacity power battery cells provide long - duration battery life and power.

Can be set to tighten in clockwise and counterclockwise directions, with torque set separately for each.

Can set the number of batches; an audio prompt will sound after reaching the preset number of locks.

Can be set to 50 different torque levels.

BCT Button Operation Interface

Explanation of LED Status Indicator Lights:

Yellow A steady yellow light indicates that the battery level is low, prompting the operator to replace the battery.

Green A steady green light indicates that tightening is OK and the set torque value is reached;
A steady green light accompanied by a long “beep” sound means that the number of normal tightenings has reached the quantity set by the batch count setting.

Red A steady red light accompanied by a long “beep” sound indicates abnormal tightening or a tool malfunction.

Alternating Alternating flashing of red and green lights indicates that the tool is in reverse mode.

RE-BOX-D1 Wireless transmission controller & Wireless transmission power tool

The wireless transmission controller is a device used for wireless Bluetooth communication with tools, which can transmit tool information to the factory system through wired communication.

Equipped with a screen and buttons, allowing real - time viewing of tool information.

MODEL: RE-BOX-D1

Product Functions (RE - BOX - D1 Controller)

Real - time wireless transmission communication

Tightening error and omission prevention

Power Input	Supports DC12V or 24V
Bluetooth Communication	Currently supports 1:1 wireless Bluetooth communication and pairing with tools
Network Port Communication	Integrates an RJ45 network port, supports network port communication
Serial Port Communication	Supports RS232 serial port communication
I/O Output	Includes 4 groups of 12 - core I/O outputs, supports output of normally open or normally closed signals (OK, NG, Batch Completion, Tool Connected)
Power Output	Supports DC12V or 24V output (varies with the input power supply)
P - Count	Anti - missing lock, error prompt, module quantity prompt

Cordless Sensor Tool - Pistol type

Comparability, low reaction force, and high precision

The display screen and buttons at the rear end of the tool can perform programming functions.

Torque Control	Sensor Parameter Setting
Angle Control	Batch Count
Quick Switch of Tightening Programs	Tool Information Query
99 Groups of Pset Can Be Preset	System Setting
Tightening Results	Torque and Angle Judgment Results 100ps

Function Introduction

- WiFi wireless transmission function
- Multifunctional indicator light for timely tool status display
- The tool is equipped with a high - definition display screen for quick programming and result checking
- Closed - loop control of torque, speed, and rotation angle to ensure tightening precision and traceable results
- 99 tightening programs
- The tool can edit parameters via the panel or controller for quick switching of tightening strategies
- Visual torque verification on the display screen
- Switchable between Chinese and English operation interfaces

Explanation of LED Indicator Lights

- A constant yellow light indicates low battery power, prompting the operator to replace the battery.
- A green light indicates that tightening is OK and the set torque value is reached. A green light accompanied by a long “beep” sound means the number of normal lockings has reached the quantity set for batch counting.
- A red light accompanied by a long “beep” sound indicates abnormal locking or a tool malfunction.
- Alternating flashing of red and green lights indicates that the tool is in reverse rotation status.

Output Voltage	18/36V
Weight	0.6Kg
Order Number	3P512610000

Special gear head

The TORERO special gear head is suitable for various narrow - space areas where ordinary tools are difficult to access, and transmits the torque required for tightening to the bolts in that area.

A closed - type special gear head is required when tightening bolts and nuts.

An open - type special gear head is required when tightening pipes and hoses.

- High precision: +/-6% (closed structure), +/-15% (open structure)
- Suitable for connecting to the unified housing of all electric clutch torque - setting tools and servo sensor tool interface types
- Highly modular
- Excellent ergonomic design

Open Special Head Tightening of Pipe Nuts

Closed Special Head Tightening of Bolts and Nuts

Torque testing equipment

Hard Joint

MODEL	CST-15	CST-30
Power Supply	5V	5V
Measurement Range	0.5-15Nm	1.0-30Nm
Bolt Specification	M8	M8
Order Number	5T026160000	5T026150000

- Accuracy: +/- 0.5% (at rated output)
- High-definition 4.4-inch color display screen, allowing you to view the tool tightening curve and historical tightening records.
- Capable of testing torque average value, maximum value, minimum value, difference value, pass rate, σ value, 3σ value, CM value, and CMK value.
- Three unit switching options: Nm, kgf.cm, lbt.ft.
- Three measurement modes:
Measurement mode: Used for continuous measurement and calibration.
Standard mode: Used for measuring clutch tools and servo sensor tools.
Pulse mode: Used for detecting oil pressure pulse tools.
- Can detect torque in both forward and reverse directions.
- Can be equipped with a high-precision sensor, capable of detecting small-torque oil pressure pulse tools and clutch tools.
- Built-in high-performance lithium battery, enabling continuous use for more than 10 hours.
- Can be connected to a computer for data extraction, analysis report generation, and printing.

Simulator

Simulated Bolt Test Bench

The simulated bolt test bench can provide torque precision testing for oil pressure pulse torque-setting tools, clutch tools, and electric servo tools.

- 10-inch high-definition LCD touch screen, intuitive and easy to operate.
- Test report export.
- Connect the panel to manage external dynamic torque sensors and USB interfaces.
- Torque curve display.
- Includes three static sensors: 50Nm, 200Nm, 500Nm.

MODEL	Hydraulic Measurement Range	Order Number	Remarks
Simulated Bolt Test Bench (HTD - 3280)	2.5Nm-500Nm	5T300000000	Including Static Sensor

Handheld Torque Tester

Accuracy: +/- 0.3% (at rated output)

Used for hand tools, torque tools, or rotation measurement applications.

Bidirectional torque measurement and angle measurement

Non-contact type

Rotation speed: 10000rpm

Compact design

Note: Do not use it for the inspection of pneumatic/electric impact tools!

Static Sensor Tester

- 7-inch high-definition LCD touch screen, intuitive and easy to operate.
- Test data can be exported in the form of an Excel spreadsheet.
- Torque curve display.
- USB interface.
- Power supply: 100V - 230V.
- Can be connected to a computer for data extraction, analysis, and report printing.

Accuracy: +/- 0.5% (at rated output)
Used for torque inspection and adjustment of oil pressure pulse tools. (For discontinuous oil pressure pulses, an optional software simulator accessory is required.)
Torque inspection of manual torque wrenches.
Note: Do not use it for inspection of pneumatic/electric impact tools!

Battery rubber strip pressing tool

- Unique patented pressing design makes the adhesive strip pressing process easier and more stable.
- Impact frequency can be adjusted via the display screen buttons.
- Compact gun-type design for more comfortable operation.
- Large-capacity power battery cells provide long-lasting battery life and strong power.
